

INFORMATION SECURITY POLICY

The purpose of the Information Security Policy is to record the goals and objectives of Chint Power and related Group Companies for locations, assets, processes and personnel in line with company strategies and to convey what needs to be done to implement this understanding.

Chint Group, which was founded in 1984 as a global power, has always been based on the principles of customer satisfaction and trust and has become one of the leading companies in the energy sector providing services in the field of renewable energy at a single point in the Turkish market with low, medium and high voltage electricity products, solar energy investments, production and sales of solar panels, inverters and energy storage products. Today, Chint Group, one of the largest publicly traded energy companies in China, operates in 140 countries and creates value for its business partners with 40,00 employees.

Within Chint Group, access controls in accordance with the principle of always knowing as much as necessary and security measures in accordance with the developing technology are taken. Considering information security threats, the organization applies an information security risk management system that provides an appropriate balance between risks and measures in terms of information assets and services. Our information security objectives within this framework;

- o The main objective is to ensure information security and business standardization in the management of processes.
- o All employees of the company are obliged to keep the secrets they have learned both within the company and with the customers and third parties with whom the company has relations.
- o Access tools assigned to the user cannot be shared with anyone, including technical personnel, under any circumstances.
- o Compliance with legal requirements and contracts is a top priority.

As Chint Power, we accept it as an inevitable duty to expand our vision, grow and increase our contribution to the national economy with our experience in every field in which we operate.
